

Multidisciplinary history and update on Gd-based contrast agents and nephrogenic systemic fibrosis (NSF)

23. September 2010, kl. 14.00 - 18.00
Odense Universitetshospital
Auditorium 1 & 2, Klørvænget 6, st, indgang 93
5000 Odense C

14.00 – 15.00	Præsentation af data fra Dansk Nefrologisk Selskabs Landsregister 2009	James G Heaf
<hr/>		
15.00 – 15.05	Introduction	Peter Marckmann, Professor, Consultant, MD, Department of Nephrology, Odense University Hospital
15.05 – 15.30	History and chemical stability of Gd-based contrast agents	Henrik Thomsen, Professor, Consultant, MD, Department of Radiology, Copenhagen University Hospital Herlev
15.30 – 15.55	The Herlev NSF experience and a global NSF epidemiology update	Peter Marckmann
15.55 – 16.15	The Aarhus NSF experience	Tina Elmholdt, MD, PhD student Institute of Clinical Medicine, Aarhus University Hospital Skejby
16.15 – 16.30	Break	
16.30 – 16.50	NSF from a dermatologist's viewpoint	Lone Skov, Professor, Consultant, MD Department of Dermatology and Allergology, Copenhagen University Hospital Gentofte
16.50 – 17.05	NSF from a pathologist's viewpoint	Mette Ramsing, Consultant, MD Department of Pathology, Aarhus University Hospital
17.05 -17.35	Gd toxicity and presence in tissues after exposure to Gd-based contrast agents	Jerrold Abraham, Professor, MD Department of Pathology, State University of New York, Upstate Medical University, Syracuse, NY, USA
17.35 – 17.55	Danish guidelines for use of Gd-based contrast agents	Brian Stausbøl-Grøn, Consultant, MD MR Research Centre, Aarhus University
17.55 – 18.00	Closing remarks	Peter Marckmann
